Bsc Computer Science , first-division
- Project : Made a hotel website as a frontend using HTML and CSS

PERSONAL PROJECTS

Banggood-Clone
- Here we tried to clone Banggood's Website which is a popular E-commerce Website based in China.
- Our website allows people to buy and sell physical goods, and services.
- developed along with a team of 5 members in one week.
- My task was to complete woman's products and the footer with a coupon page. Also, Contribute to different pages for making site data.
- Tech stack : Html, CSS, Javascript

Bath and body works-Clone
- Bath & Body Works, LLC. is an American specialty retailer company founded in the year 1990.
- It is an American retail store chain that sells soaps, lotions, fragrances, and candles.
- developed along with a team of 6 members in 6 days.
- my task was to complete product pages and footer. For creating a data I use a contructor function.
- Tech stack : Html, CSS , Javascript

DeskTime-clone
- DeskTime is a desktop and mobile time tracking app for companies and freelancers.
- Allows the account admin to track their time by using TIMER. User can also track their project and make a todo-list.
- It was a solo project that I had to finish within 5 day.
- here I mainly worked on JSON-server and routing and frontend part.
- Tech Stack : React, CSS , JSON-server
